Dhaka, Bangladesh

Full-Stack Developer | Agency Founder | Event Operations Lead

Summary

Agency founder and full-stack developer with 3 years delivering production web platforms, brand strategy, and international event operations. Founded NOÉTIC Studio in April 2023; grew to 50+ clients and 5 live platforms built in Node.js, TypeScript, and React. Currently serve as Organising Secretary at IGAC managing 250+ staff across conferences reaching 1700+ participants, and direct visual strategy for Dhaka Beats (50,000+ followers). Lead IT infrastructure for a British Columbia-based client remotely as sole IT Head. Developing a custom OS in C++ and a database management system; pursuing A-Level Physics, Mathematics, and Computer Science.

Technical Skills

Web & Full-Stack Development

- **Node.js, TypeScript, React**, JavaScript, REST API development, social media API integration
- Custom CMS development, event registration systems, responsive design, SEO optimization
- Server management, web infrastructure, production deployment, Git version control
- Full-stack architecture, database integration, cross-browser compatibility, front-end/back-end separation

Design & Creative

- **Adobe Creative Suite, Figma**, brand identity design, UI/UX design, typography systems
- Campaign design, event visual production, marketing collateral, social media content creation
- Visual strategy, graphic design, logo systems, event branding, promotional materials

Systems & Infrastructure

- **C++** (OS kernel development), **SQL** (database architecture), IT infrastructure management, systems programming
- Technology strategy, digital systems implementation, remote IT delivery, payment infrastructure (in development)

Leadership & Operations

- Event management, team leadership, vendor management, budget oversight, logistics coordination
- Client management, project management, business development, digital marketing strategy

Data & Research

- Data engineering study (pipeline architecture, aviation data systems), ML research (personal)
- A-Level Physics, Mathematics, Computer Science (in progress); self-directed aerospace preparation

Experience

Full-Stack Web Development & Creative Agency

Apr 2023 – Present

Founder & Creative Lead, NOÉTIC Studio

- Founded NOÉTIC Studio in April 2023; grew to 50+ total clients and 15+ active engagements across technology, retail, and service sectors in Bangladesh and Canada within 3 years.
- Built and deployed 5 live client web platforms in Node.js, TypeScript, and React, spanning custom CMS systems, event registration tools, and social media-integrated content hubs.
- Developed brand identity systems, UI/UX design, and SEO strategies for 15+ active clients; deliverables include logo systems, typography, visual frameworks, and campaign-ready design.
- Pitched NOÉTIC Studio to Dhaka Beats while employed as Lead Graphics Designer, converting the employer into a new agency client; delivered the platform with CMS and social media feed integration.
- Implemented SEO and custom CMS solutions across client platforms, improving search visibility and content workflows for media, retail, and events sector clients.
- Managed 15+ concurrent projects across web development, brand identity, and digital strategy as sole operator, coordinating timelines and deliverables across multi-sector client engagements.

International Event Operations & Organisational Leadership

Dec 2025 – Present

Organising Secretary, International Global Affairs Council (IGAC)

- Lead full operational logistics for international MUN conferences, business forums, and corporate events as Organising Secretary; manage 250+ staff across vendor coordination, budget oversight, and planning.
- Coordinated IGACMUN Session II Powered By IDP Bangladesh – the largest IGAC conference at 1700+ participants; managed logistics, vendors, participant flow, and campaign production across a multi-country delegation.

- Coordinated 5 conferences and forums totalling 1500+ participants, including IGACMUN III (800+), Bizonomix 2025 (600+), and Republic MUN (300+); managed sponsors BRAC Bank, NEXT Ventures, and IDP Bangladesh.
- Develops and executes digital marketing strategies combining social media campaigns and promotional content to drive participant engagement across IGAC conferences reaching 1500+ cumulative attendees.
- Transitioned from MUN delegate to Organising Secretary at IGAC, applying participant-side perspective to logistics design, delegate programming, and conference communications for 250+ staff teams.

Visual Strategy & Event Campaign Direction

Mar 2026 – Present

Lead Graphics Designer, Dhaka Beats

- Direct visual strategy and content production for Dhaka Beats, Dhaka's leading music platform with 50,000+ followers; work spans event campaigns, promotional materials, and social media content.
- Conceived, designed, and executed the full Jashn-E-Eid cultural event campaign drawing 8000+ visitors; scope covered visual branding, venue design, vendor coordination, and day-of production management.
- Identified a web platform need at Dhaka Beats and pitched NOÉTIC Studio to build it, converting the employer into an agency client; delivered the site with CMS and social media integration.

IT Infrastructure & Digital Systems

Aug 2025 – Present

IT Head, Taj Water Ltd (British Columbia, Canada)

- Direct IT infrastructure, technology strategy, and systems architecture for Taj Water Ltd (BC, Canada) as sole IT Head; responsibilities span technology planning and digital systems delivery from Dhaka.
- Designed and deployed Taj Water Ltd's official web presence via NOÉTIC Studio as part of the IT Head engagement; platform supports BC-based commercial operations with CMS and information architecture.

Independent Systems Programming & Technical Research

2024 – Present

Personal Projects & Self-Directed Study

- Currently developing a custom operating system in C++, exploring kernel design, memory management, and low-level systems programming to build foundational understanding of computer architecture.
- Building a custom database management system implementing indexing, transaction management, query processing, and storage engine design to understand data architecture below ORM abstraction.
- Developing a web-based custom payment gateway; implementation covers transaction security, API integration, payment flow design, and alignment with industry compliance requirements.
- Studying data engineering with applied focus on aviation contexts; work covers pipeline architecture and data systems design applied to flight data, sensor telemetry, and aerospace data management.

Education

International Advanced Level (A-Level): Physics, Mathematics, Computer Science In Progress – Expected June 2027
British Council Bangladesh, Dhaka, Bangladesh

IGCSE

June 2025

The Radius International School, Uttara, Dhaka, Bangladesh

Languages

Bengali (Native) · English (Bilingual) · Hindi (Conversational) · Polish (Learning)

Honors & Awards

- **Intra-School Debate Competition**, The Radius International School, Dhaka (2023, 2024, 2025). 1st Place ×1, 2nd Place ×2, Best Speaker ×1.
- **Second Place, Science Fair**, The Radius International School. Built a Bluetooth-controlled prosthetic robotic hand using 3D printing, microcontrollers, and servo motors.
- **Taekwondo Red Belt**
